In 2007, Dr. Angela Ganjoor graduated with honors from Texas A&M Dental School in Dallas Texas, previously known as Baylor College of Dentistry. Dr. Ganjoor, also known as "Dr. G" by her patients, keeps up with the latest dental practices as well as the most modern dental technology and equipment in her practice by taking hundreds of hours of continuing education classes per year. They also now use the Fotona Laser in their office! With this state-of-the-art equipment, they are the only practice in this area that can use laser technology on almost all dental treatments from restoring cavities to treating snoring and obstructive sleep apnea.

Celina Family Dentistry is privately owned and operated by Dr. Ganjoor. She says, "Our goal is to provide the best quality dental care to our patients in a most comfortable, up to date and state of art dental office." Dr. Ganjoor makes her home in Celina with her husband, their son and 3 dogs. She says, "Celina Family Dentistry is where patients become part of our extended family. Our staff members are friendly, knowledgeable and more than happy to go out of their way to help and accommodate their patients."

The experts at Celina Family Dentistry specialize in all aspects of dental care, including but not limited to biannual dental cleaning and checkup x-rays, periodontal therapy, extractions, wisdom teeth extractions, teeth replacement options, fillings, crowns and bridges. Their office is now providing Therapeutic Botox for the treatment of TMJ and myofascial pain. They also offer implant placements and restorations, over dentures and partials, cosmetic dentistry and professional life-long whitening options in addition to Fast Braces and clear aligners. And finally, they screen and treat their patients with obstructive sleep apnea and other forms of breathing related sleep disorders.

"What sets us apart at Celina Family Dentistry is our passionate care and love for dentistry which enables us to always put our patient's comfort and needs first. We give our patients individualized personal care according to their own specific dental needs. We also have flexible hours as early as 8:00am to as late as 6:00pm which enables us to accommodate patients with different lifestyles. We are also open one Saturday a month to accommodate our patients who are unable to come in during weekdays."

When asked why Dr. Ganjoor chose the dental field as her profession, she spoke of a time when she was 9 years old and her parents took her to the dentist for the very first time because she had a crooked front tooth. Rather than offering orthodontic treatment to align the crooked tooth, he recommended just extracting it. "My parents did not know any better, they trusted a professional's opinion. So, my perfectly healthy, cavity-free tooth was pulled and of course there was no other tooth replacing it for many years, because it was one of my permanent teeth. Throughout my teenage years, I was very self-conscious about my smile because of that missing front tooth. I was young enough to where implant was not an option and even it was, my parents could not afford it."

Encountering such a bad personal experience early on in life enlightened her to pursue Dentistry as a career. "I wanted to provide my patients with proper recommendations regarding their dental care. When I went to dental school, I was able to get orthodontic treatment and get a dental implant to replace my missing tooth to enhance my smile." Because of her own personal experience, she knows firsthand how our smiles can affect our self-esteem and confidence.
